AST 222 Problem Set 1a

Due on Wed. Jan 22 at the start of class with Problem Set 1b

Please staple all of your work together

Student name: *Student number:*

Problem 1: (2 points) Getting Started with Python

Preliminary Steps:
(a) Figure out how to open a terminal on your computer
(b) Determine if you have python on your computer. If you do not have python, install it.
(c) Determine if you have jupyter notebook on your computer. If you do not have jupyter notebook, install it.

For marks, submit a screenshot of your jupyter notebook session that contains the following:
(a) Printing the statement "Hello World"
(b) Saving your UTORID as a variable
(c) Saving the sum of each digit in your UTORID as a variable
(d) Printing the two above variables
TIP1: Feel free to help each other and stand on the shoulders of the internet.
TIP2: Make sure you complete the assignment on YOUR OWN computer, or else you will be in for a major headache later in the semester.
